TOOLS

Rhinoceros	Advanced
Grasshopper Gold	Advanced
Grasshopper	Intermediate
ZBrush	Intermediate
Peacock	Basic
KeyShot	Rendering
Chitubox	Printing

PRODUCTION

STL preparation and review · Resin 3D printing · Post-processing and finishing · Casting tree assembly and casting

EDUCATION

Industrial Design
Pontificia Universidad Javeriana
2018 – 2022

Certified courses
Rhinoceros basic & advanced · Rhino for jewelry · Grasshopper

3D Jewelry Designer

PROFILE

Industrial designer specialized in 3D jewelry modeling since 2022. I turn sketches, references and sculptures into production-ready models: set rings, pendants, earrings, bracelets with mechanisms and organic pieces. Expert in Rhinoceros and Grasshopper Gold, with hands-on experience in resin 3D printing, STL preparation and casting. Background in teaching and in running a jewelry design studio.

EXPERIENCE

3D Jewelry Modeler · Freelance
2023 – present

- Model custom jewelry from client sketches and references: rings, pendants, earrings, organic pieces and pieces with mechanisms.
- Define geometry and dimensions, and review every design with the client before production.
- Adapt sculptures and physical objects into jewelry through 3D scanning and digital modeling.

Co-founder · Design & Operations · Centro de Diseño Servicast
May 2025 – Jan 2026

- Launched and ran a studio for 3D design, resin printing and casting services, in partnership with Servicast.
- Modeled jewelry, handled clients and approved designs before production.
- Coordinated production and one team member; managed cash, accounts and silver and gold inventory.

3D Jewelry Modeler · Servicast
Oct 2024 – May 2025

- Modeled pieces and prepared STL files for resin 3D printing.
- Post-processed prints and supported casting tree assembly, investing and casting.
- Checked each piece against the approved design, working directly with clients.

3D Jewelry Modeling Instructor · Voxel 3D Lab
Aug 2022 – 2024

- Taught Rhinoceros, Grasshopper Gold and Peacock for rings, pendants and bracelets.
- Guided each student through proportions, weight estimation and print preparation, up to their own printed piece.

Industrial Design Intern · Voxel 3D Lab
Jun – Dec 2022

- 3D modeling, file preparation, printer operation and rendering for varied projects, including a prosthetic for a cat's leg and an artistic mechanism.

SELECTED PROJECTS

Sculptural collection. Flock, Serpi, Unidad, Conciliación and Radiant (with Claudia). Clay sculptures translated into digital geometry and modules for different jewelry typologies.

Interbeing. Bracelet built from digital petals; co-designed the clasp mechanism.

Technical jewelry. Set and halo rings, figurative and organic pieces, a produced cat charm and moving mechanisms.

OTHER EXPERIENCE

Graphic design and digital illustration, freelance (2021 – 2022), for U-Vnitim & CIA S.A.S.
